## COMMENTS

EPITRAN MC Meeting: We need a quorum, so you need to be there!

ORAL presentations: In the perspective of moving towards a more substantial funding scheme in a European context in the future, we need to get an overview of the scientific landscape in each country.

We need **ONE representative PER participating COUNTRY** who is willing to present an overview of groups in his country working on EPITRAN topics. Volunteers please contact any of the organisers!!

POSTER presentations: This is your own science, for you to present your own results. If you attend the conference, you may consider using the same poster. The poster venue will also be the same as for the conference.

Looking forward to seeing you!

The organizers

Mark, Jean-Yves & Alessandro

### Suggestions for Oral presentations

- The idea is to collect information about groups in each country that might be interesting as cooperation partners to each individual, but also and in particular as a potential participant in a larger funding scheme.
- In addition to a “landscape” of working groups, information on specific technologies available, and on relevant companies are of interest.
- Given that each of us has a specific area of interest, it is considered normal that the presenter would put emphasis on that area, and outline some of his own activities.
- It is understood that this information will be made available to all participants by sharing the files used for the presentation (ppt or pdf).
